### **DETAILED ACTION**

Claims 1-47 are pending in this application.

#### ***Request for Continued Examination (RCE)***

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on November 15, 2007 has been entered.

#### ***Action Summary***

The rejection of claims 1-47 under 35 U.S.C. 102(e) as anticipated by de la Poterie is hereby withdrawn in view of the Declaration under 37 C.F.R. § 1.132 filed November 15, 2007.

#### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 6, 7, 17, 18, 25, 26, 36 and 37 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Applicants use the phrase

"less than about" or "greater than about" in the claims when describing "glass transition temperature", "a loss of gloss", "molecular mass" of the coupler and the film-forming polymer. It is unclear to the examiner if it is "less than", "greater than" or "about" are the intended values.

***Declaration under 37 C.F.R. § 1.132***

Applicant has submitted a Declaration under 37 C.F.R. § 1.132 comparing the film-forming polymer composition of de la Poterie with the composition of the instant invention. The study was to demonstrate that the film-forming polymer of the instant invention is soluble in an organic solvent in an amount greater than 90% by weight at 25°C, whereas the prior art does not. The results of the study in ¶ 8 and 9 teach that even after 1 month at room temperature the film-forming polymer is insoluble in an organic solvent in an amount greater than 90%.

***Allowable Subject Matter***

Claims 1-5, 8-16, 19-24, 27-35 and 36-47 are allowed. The closest prior art of de la Poterie teaches a composition comprising a cosmetically acceptable medium and at least one film-forming polymer. The prior art do not teach that the film-forming polymer is soluble in an organic solvent in an amount greater than 90% by weight at 25°C as demonstrated in the declaration as filed.

**Conclusion**

Claims 6, 7, 17, 18, 25, 26, 36 and 37 are rejected.
